I think I have what I need for now for Lake Pepin. I have been data mining to try and better understand the universe of permits, what loads will be assigned and what potential limits would be. If possible, it might be good to do it as a quasi-webinar if you will have computer screens that you can view. I can set up an adobe connect session so we can share screens. That way you can see the spreadsheet as I talk through it vs having to coordinate moving around the document. Kevin is out most of this week, but I think the next step is to have a call with him so we can set clear next steps to move towards implementation.

Cheers,

Sean Ramach

Subject: next meeting

Sean, our next discussion is scheduled for tomorrow afternoon. Do you need us to send you more specific material? Do you have any materials that you want us to review prior to the meeting? If you have lingering questions for us regarding topics from last call, please let us know and we might be able to provide response materials. I am hoping that we can soon complete the discussion of Lake Pepin and move more towards implementation or RES.

Thanks. We will talk to you soon.

Steve
